

## FormFox Technical Requirements

*You don't need much to utilize the power of FormFox! Below you will find the few things that you'll want to have ready for your FormFox implementation.*

### Computer

Yes, you will need a computer. If you're unsure about buying one, we'd be happy to give our advice. A good rule of thumb is to ask if your computer will support the items below.

### Internet Connection

Any internet connection will work for FormFox (though faster is always better). Most typical browsers are compatible with the formfox.com website (i.e. Internet Explorer, FireFox).

### Laser Printer

Any laser printer will do for printing out custody and control forms (even an inexpensive one). Just make sure it's a laser printer because other printers will smear the ink on the new form.

### Adobe Reader

Adobe Reader is necessary in order to print out the new custody and control form. The Adobe application is free to download and can be found at [www.adobe.com](http://www.adobe.com).

### Barcode Scanner (optional)

Although optional, a barcode scanner will make a significant difference in speed and accuracy. We suggest a barcode *image* scanner that allows an image of the CCF to be captured.

### Dot-Matrix Printer (optional)

Another piece of equipment worth considering is a dot-matrix printer which will allow you to print Federal forms using FormFox. Dot-matrix printers will also facilitate the printing of Florida Drug Free Workplace chains.

*If you have further questions about what is required or how to get started, feel free to contact us.*
